

# Nebula Finance

Presentation

# A Hybrid Stable Coin

With a roadmap to full  
collateralization

Please note algo stable coins are extremely risky in nature. Never invest anything you can't afford to lose. All information subject to change before launch.

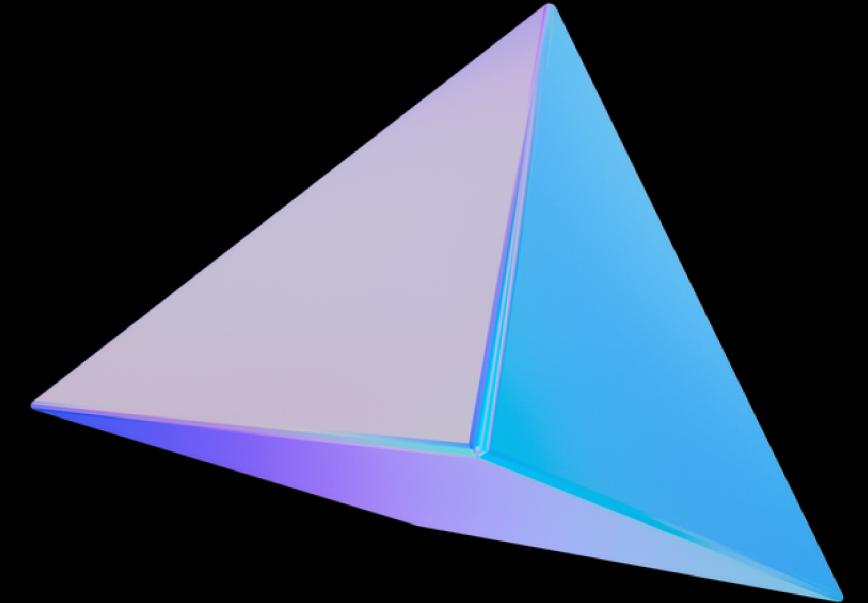

NEBULA CA\$H

# Nebula Finance

An algo based stable coin protocol that utilizes a 2 token system, with a road to full collateralization built in.

Comprised of a complex system of price phases, stabilization methods, multiple taxes and incentives, it's a massive step forward in the quest for a viable algo based stable coin.

NEBULA

# Team

**Nebulous One**  
Founder

An experienced project runner and professional degen. Having spent years developing complex DeFi ecosystem, he's excited to take a swing at one of the biggest challenges of all. Algo-stables.

**Nova Mind**  
Founder

CTO and developer with many token and complex protocol launches under his belt, he's excited for the new challenge.

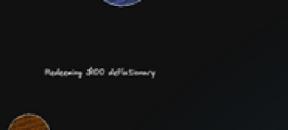

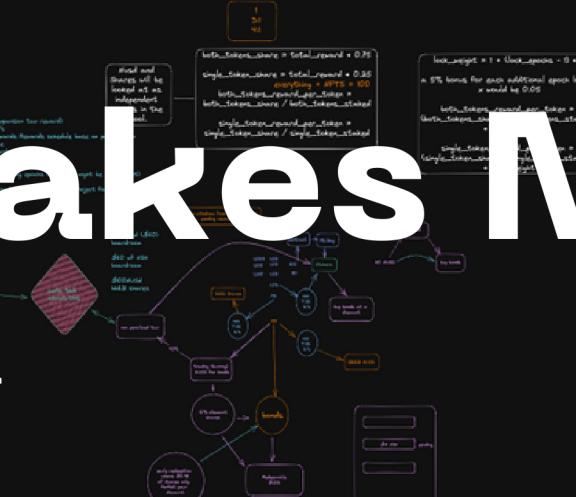

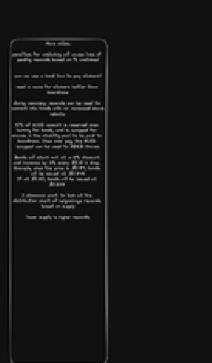

**Astro Cowboy**  
Founder

Professional Degen and hype master ring leader, he's always pushing for something new and exciting in the space.

Please understand that due to the risky nature of algo stable coins and governments aversion to them, the team will remain un-doxxed. However please do your due diligence, and we believe you will come to understand that we are capable and committed founders.

# What Makes Nebula Different?

# What Makes Nebula Different?

We're picking up where others have left off.

We've seen two token systems with bonding that work for a while, and make early investors a lot of money, only to fall apart when greed kicks in.

Where we differ is by introducing an ecosystem of taxes and rebates, along with a slew of dynamic actionable phases, featuring variable rewards and fee distribution, that lay out a full roadmap to collateralization. With multiple expansion and NSH deflationary measures at the point of overcollateralization.

# What Makes Nebula Different?

What's our game plan?

- Bonds
- Seigniorage Rewards
- Dynamic Reward Distribution
- Dual Asset Staking
- Minting and Burning
- Stability Pool
- DEX
- Weighted Epoch Locks
- Increased Stable Lock Ratio
- Tax Backed Collateral
- Share Incentivized Tax Rebates
- 6 Action Phase reward Structure
- Roadmap to Collateralization
- Dex Listing Loans

# What Makes Nebula Different?

## TOKENS:

### Nebula Cash - NUSD

- Hybrid Stable Coin

### Nebula - NSH

- Rewards token. Taxed and inflationary, but with multiple deflationary measures.

### Bonds

- Minted by burning NUSD in recovery mode, and burned when minting NUSD above peg.
- No secondary value
- Early exit options
- No Expiry
- Non-Penalized Bonding tax to reward stakers and burn NSH

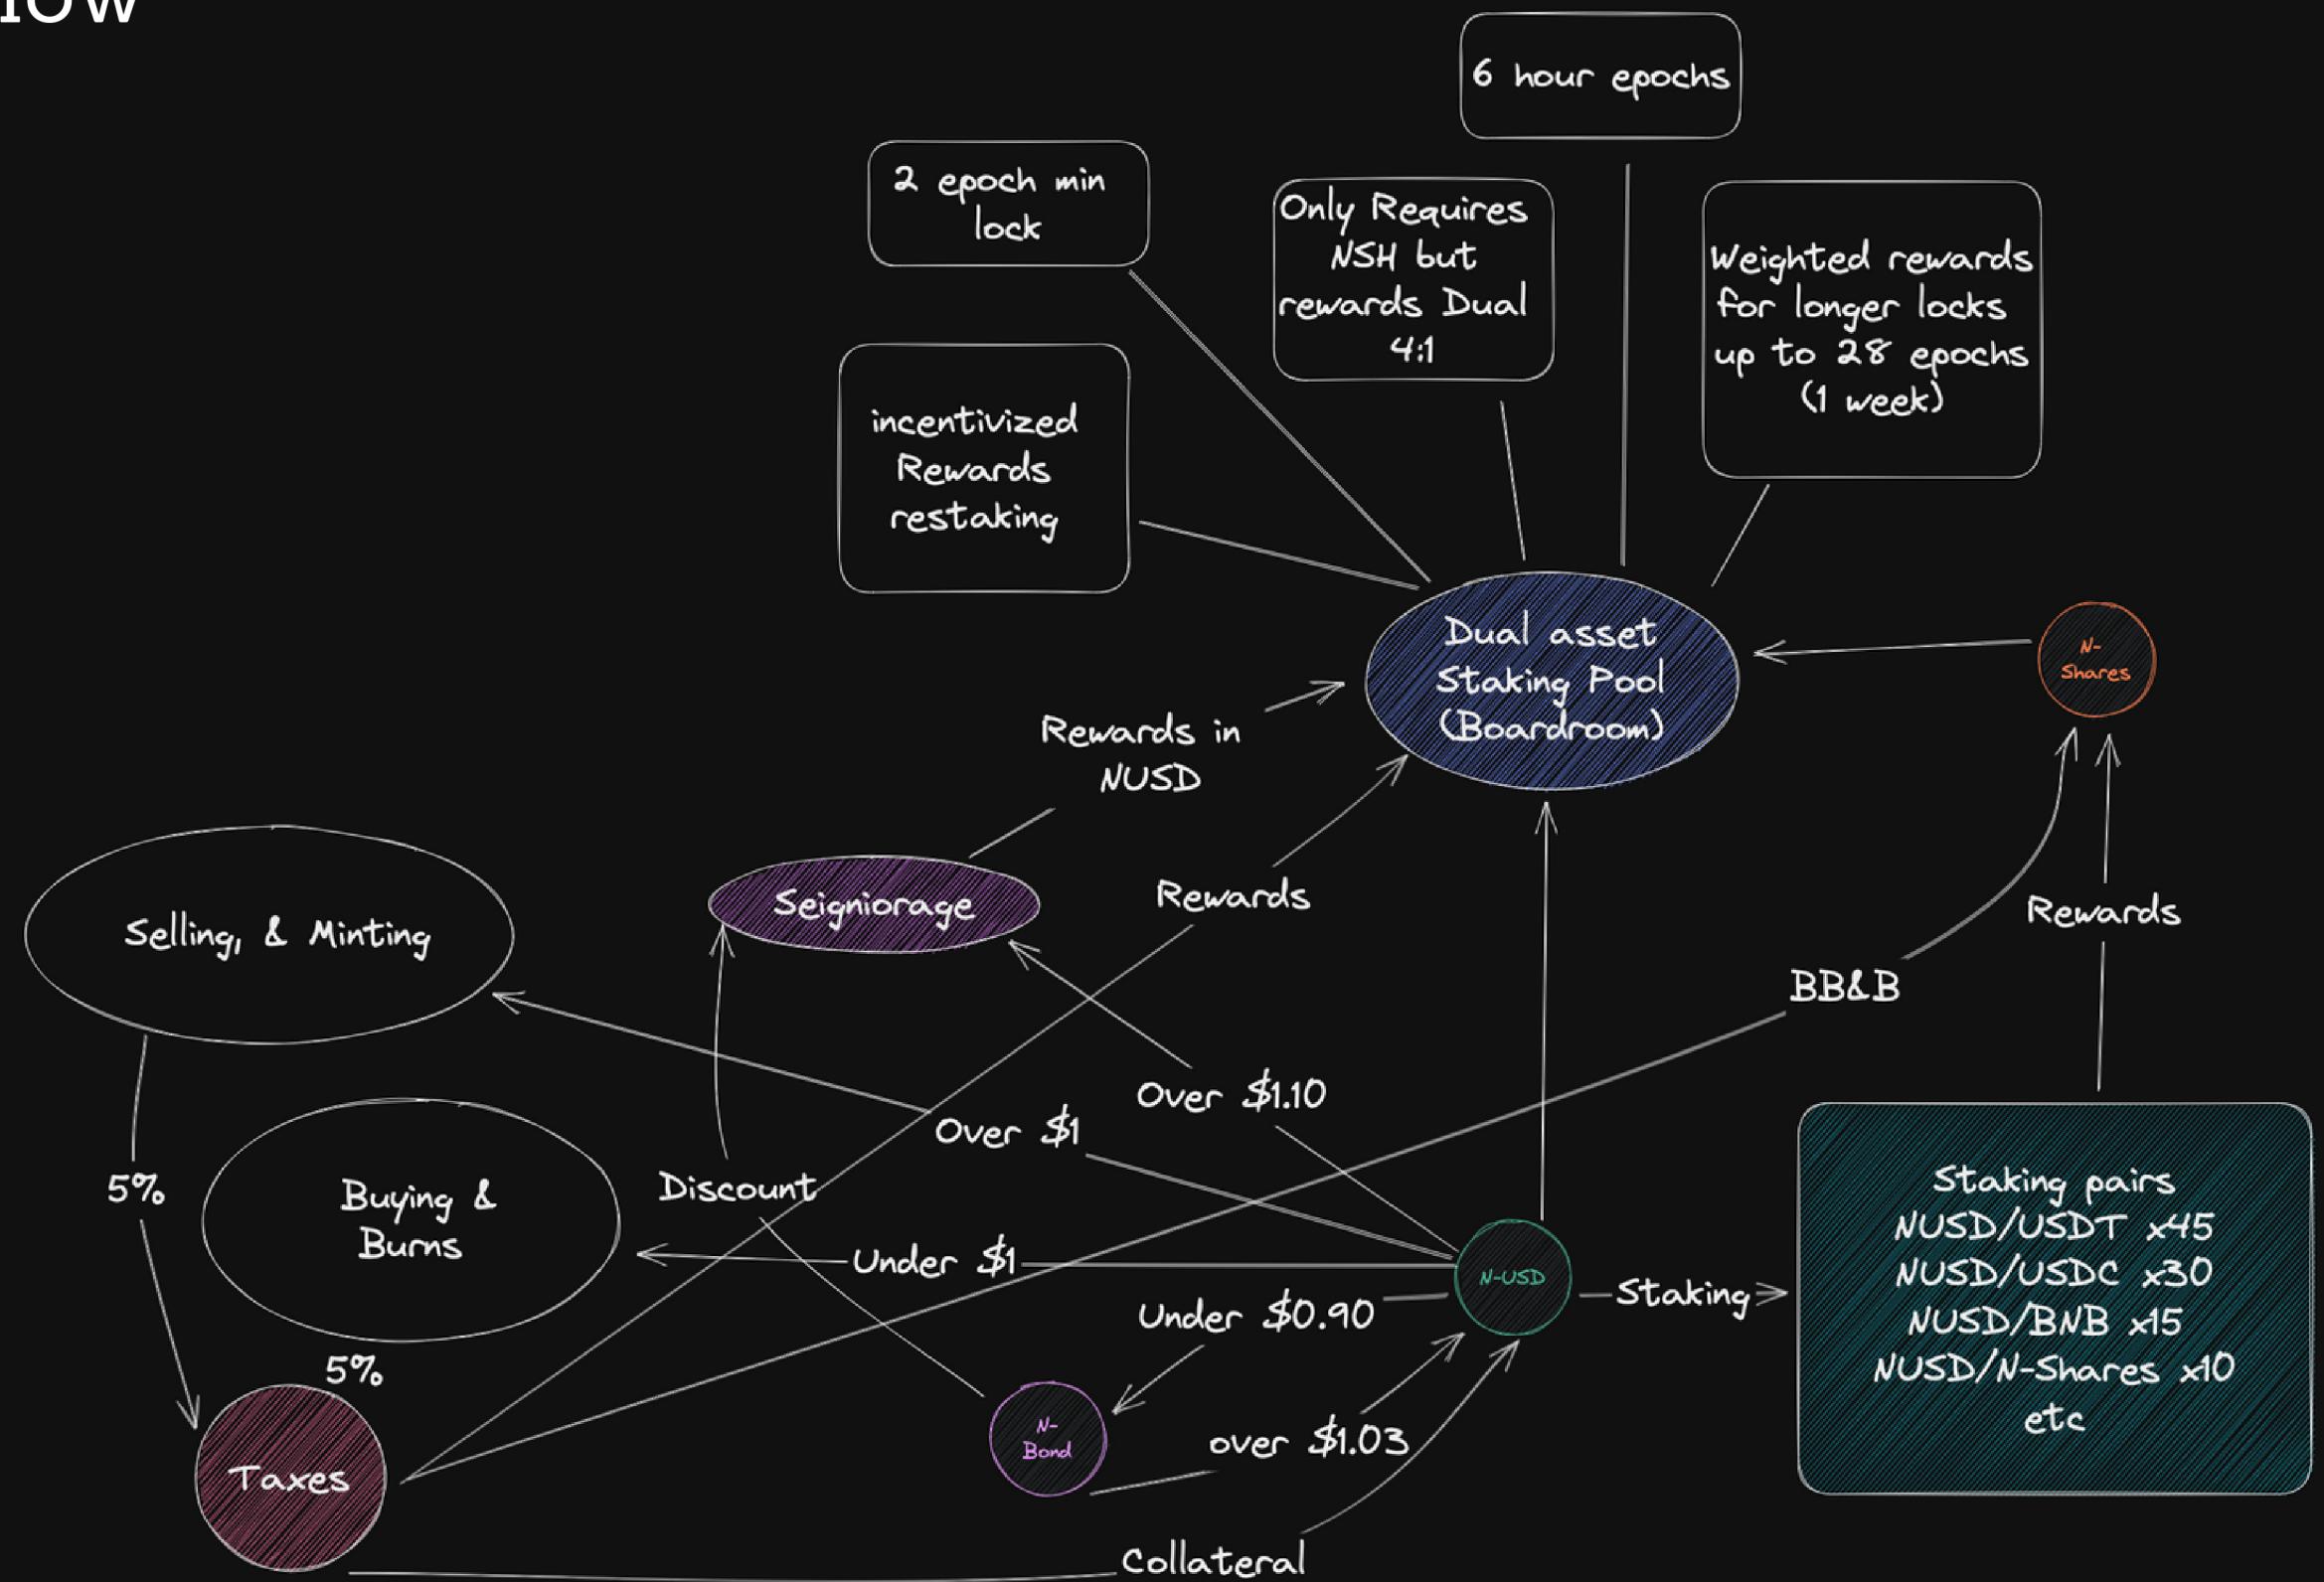

# What Makes Nebula Different?

Phase	Preference	Mechanism	Collateral Change	Tax (%)	NSH Tax/Rebate (%)
Expansion (\$1.10+)	Not-Allowed*	Burning	-	-	-
	Discouraged	Burning	Decreases	5%	5% tax
	Allowed	Minting	Increases	5%	5% Rebate
	Allowed	Selling (3rd party)	Neutral	0%	0%
	Discouraged	Buying (3rd party)	Increase	10%	0%
	Not-Encouraged	Buying (POL)	Increase	5%	5% Rebate
	Encouraged	Selling (POL)	Increase	10%	11% Rebate
	Allowed	Bonds (Redemption)	Decrease	0%	0%
Above Peg (\$1.05-\$1.10)	Not-Allowed*	Burning	-	-	
	Not-Encouraged	Burning	Decreases	10%	10% Rebate
	Allowed	Minting	Increases	10%	10% Rebate
	Allowed	Selling (3rd party)	Neutral	0%	0%
	Allowed	Buying (3rd party)	Increase	0%	0%
	Allowed	Buying (POL)	Increase	5%	5.5% Rebate
	Encouraged	Selling (POL)	Increase	10%	11% Rebate
	Allowed	Bonds (Redemption)	Decrease	0%	0%
Over-Peg Safe (\$1.00-\$1.05)	Not-Allowed*	Burning	-	-	-
	Encouraged	Burning	Decreases	5%	5% Rebate

Multiphase  
Dynamic  
Taxation and  
Rebate Fee  
Structure

# What Makes Nebula Different?

Flow

Please note this only shows a piece of the story due to the dynamic changes in variable distribution. Actions like tax rebates for example; burns may carry a 5% tax, added to collateralization, but includes a 6% NSH rebate make the tx a net+ for the user.

# Market Overview

**4**  
Of the top 20 Tokens  
by MC are Stables

**\$123,247,459,176**  
Market Size of these  
four

**\$30,411,077,864**  
Total volume in the  
last 24 hours

# Roadmap

**Q2**

- Private Sale
- Build
- Public Sale
- Minting
- Launch

**Q3**

- Progressive Collateralization
- DEX
- Listing Loans
- Lending
- Casino

**Q4**

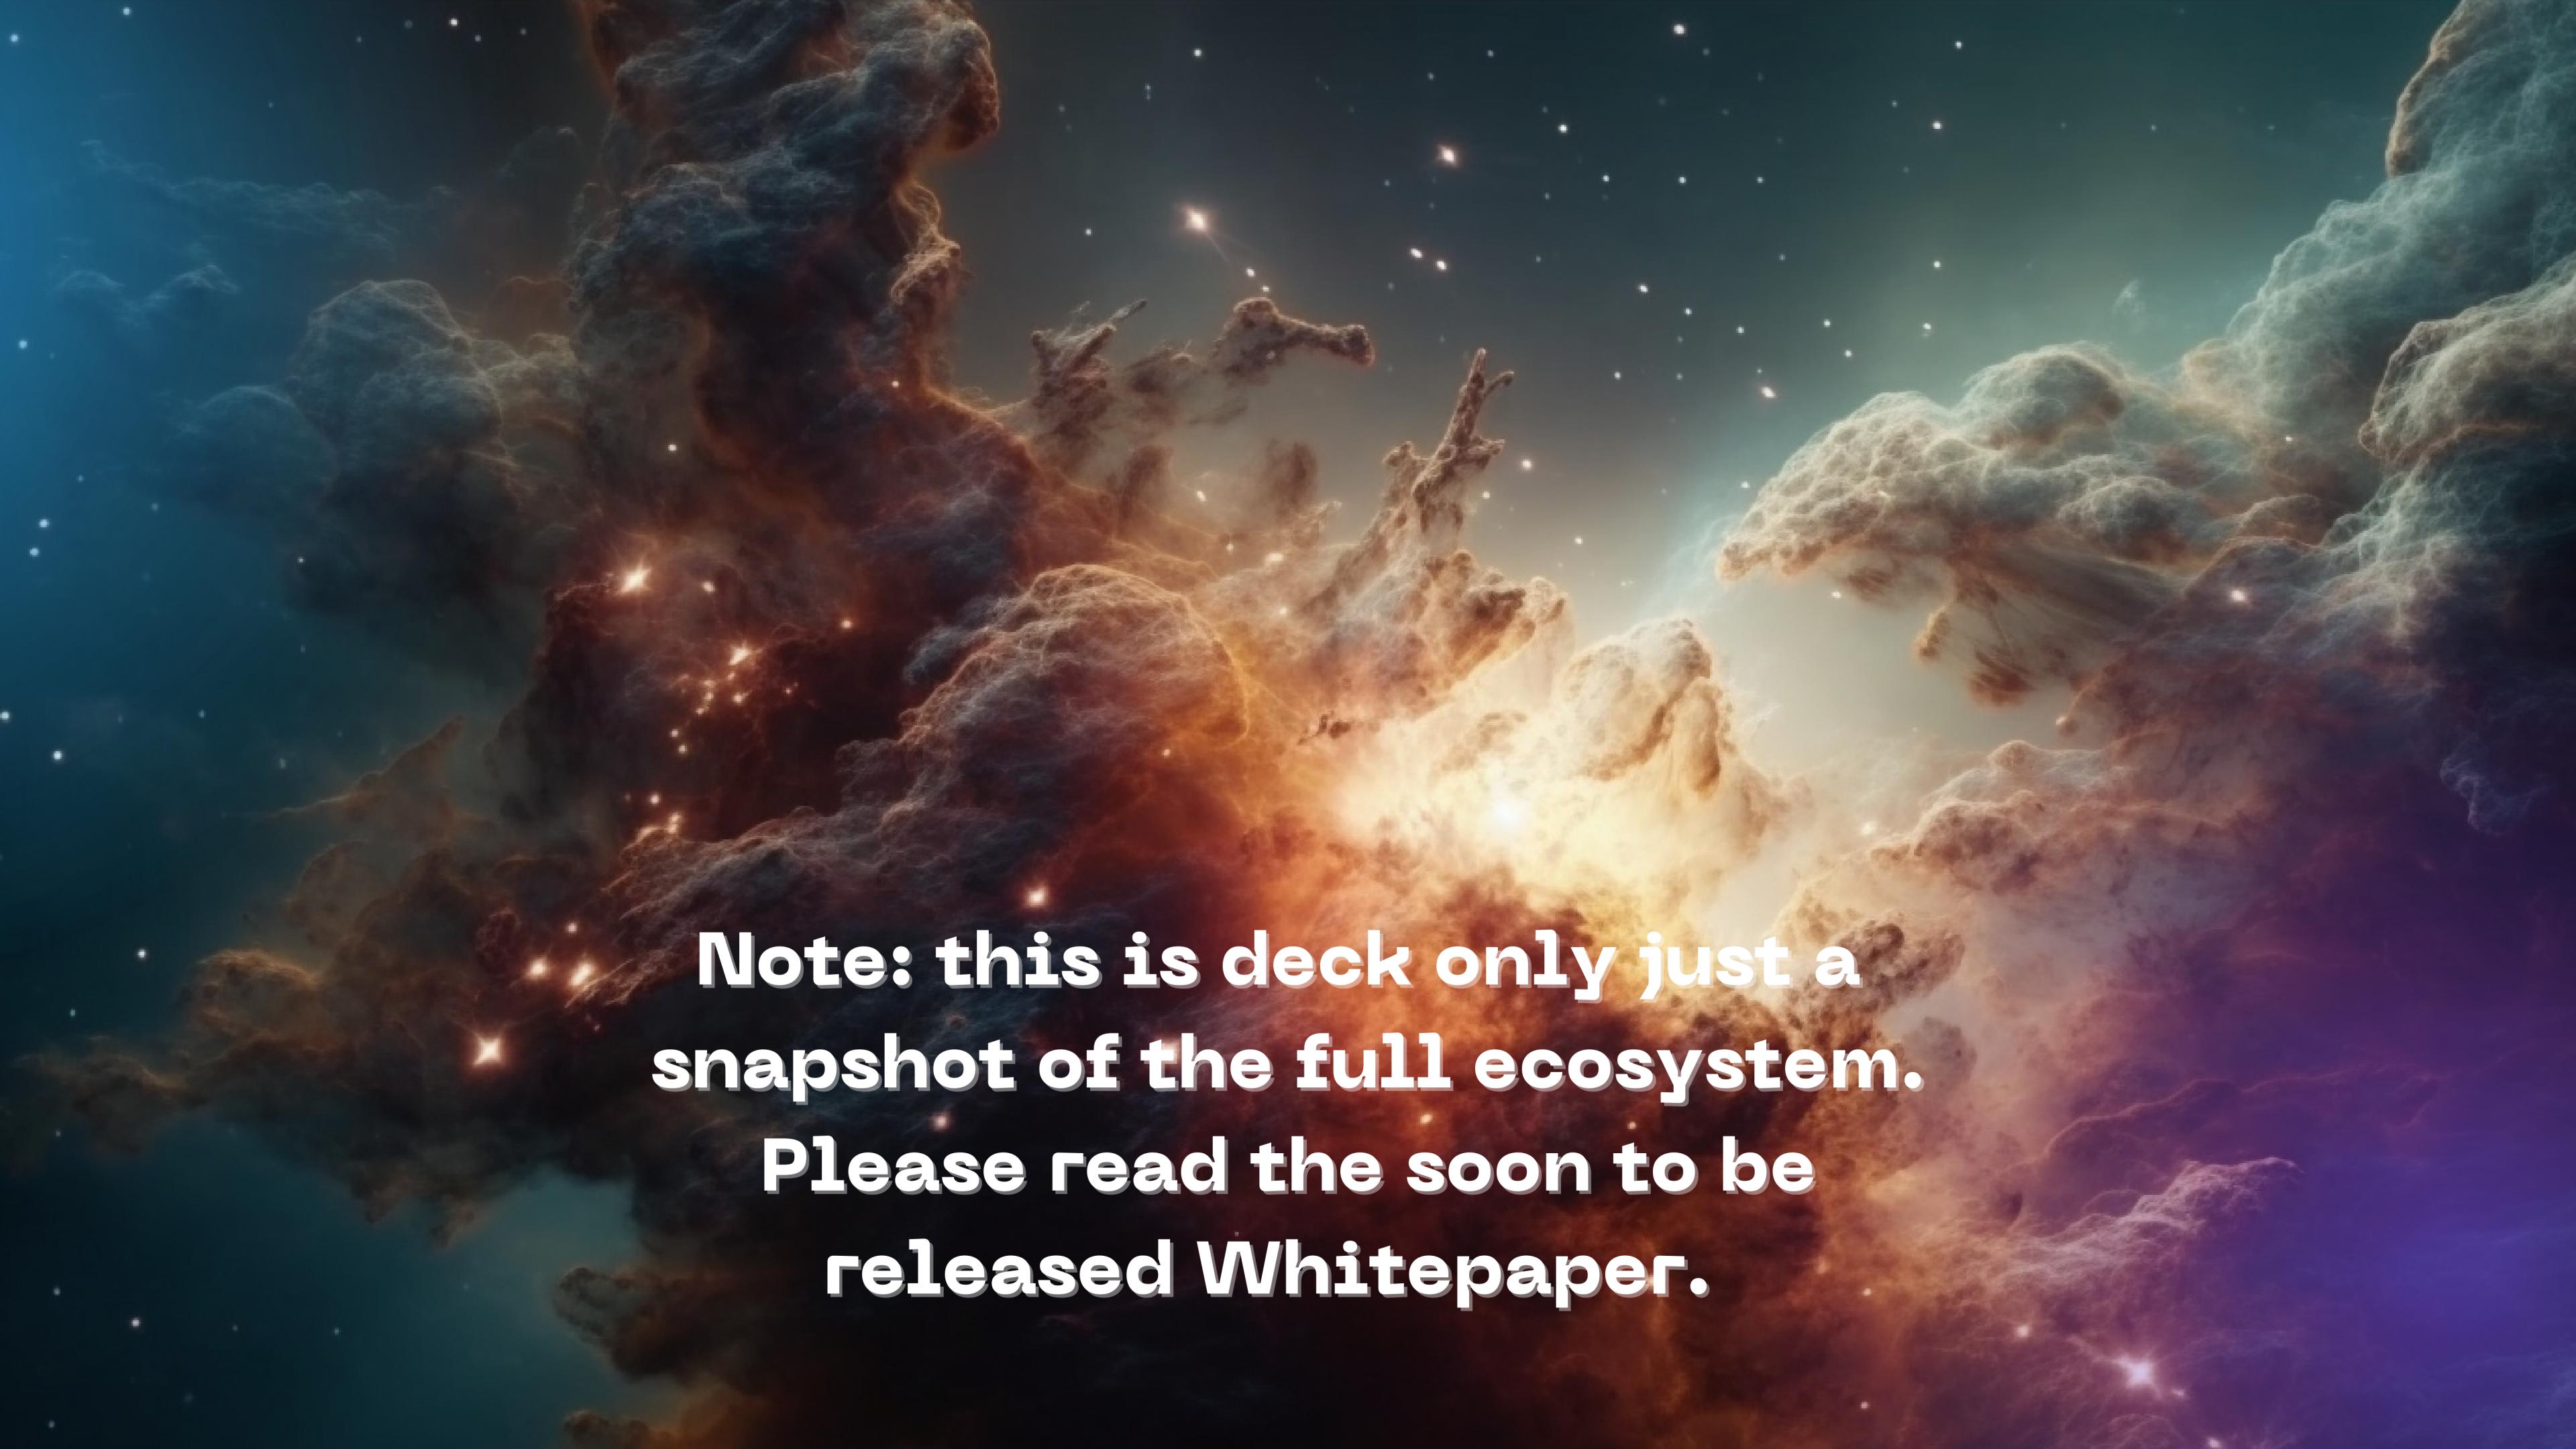

- Cross-Chain
- Expansion
- 3rd party integration
- Battle Testing

# Products

**Note: this is deck only just a  
snapshot of the full ecosystem.  
Please read the soon to be  
released Whitepaper.**

# Tokenomics

NSH - 10 Billion

1.5B Preminted (15%)

25% Private Sale (375M) Set Price

32% Public Sale (480M) Fair Launch

20% Protocol Stability (300M)\*

12% Dex/Cex/Marketing (180M)

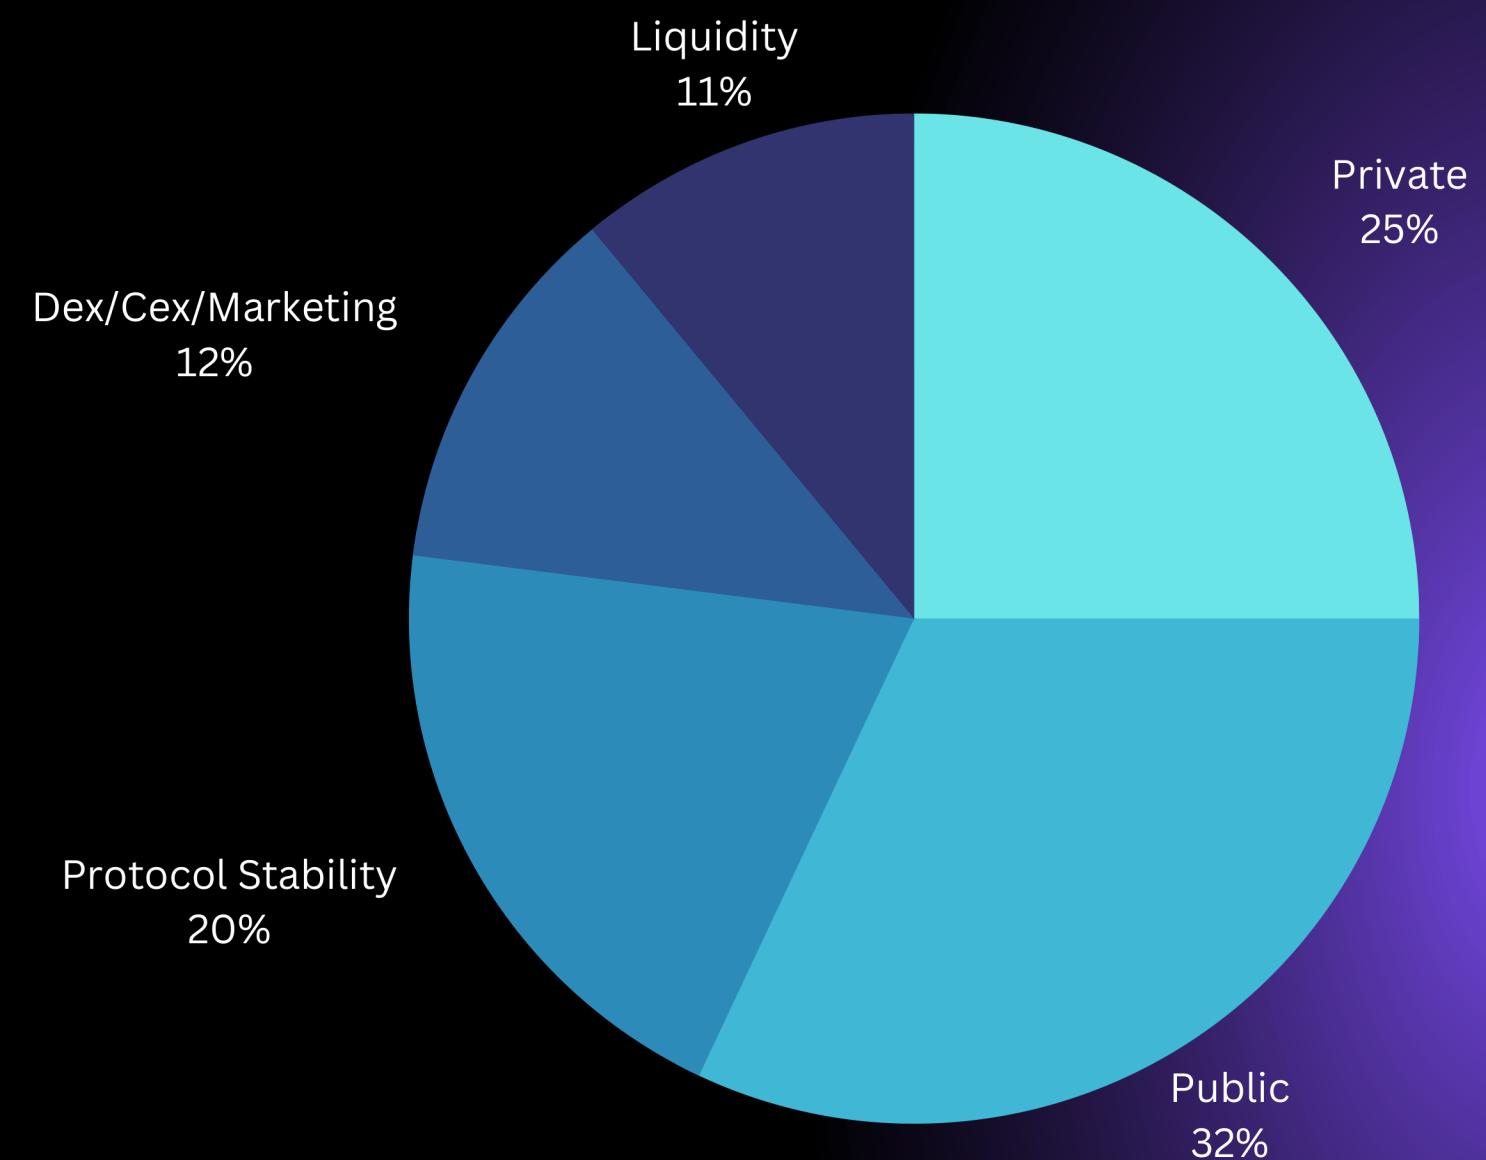

11% Liquidity (165M)

1.6% Team (160M, zero upfront, paid per block)

0.8% Marketing (80M, zero upfront, paid per block)

8.5B Minted by Farming/Bonds/Rebates

NUSD -TBD by Minting

\*Protocol stability will be used for Collateral, BB&Bs, Marketing, etc, and use Nebula's unique OTC time auction protocol. See WP for more

# Tokenomics

## Distribution

- 27% - NSH Liquidity
- 15% NUSD Liquidity
- 18% Marketing
- 15% Collateral
- 5% Sale Platform Fees
- 20% Stability Reserve

Remaining NSH - 8.5 Billion

Distributed Per Block as Farming rewards over 2-3 Years

Minted as Rebates

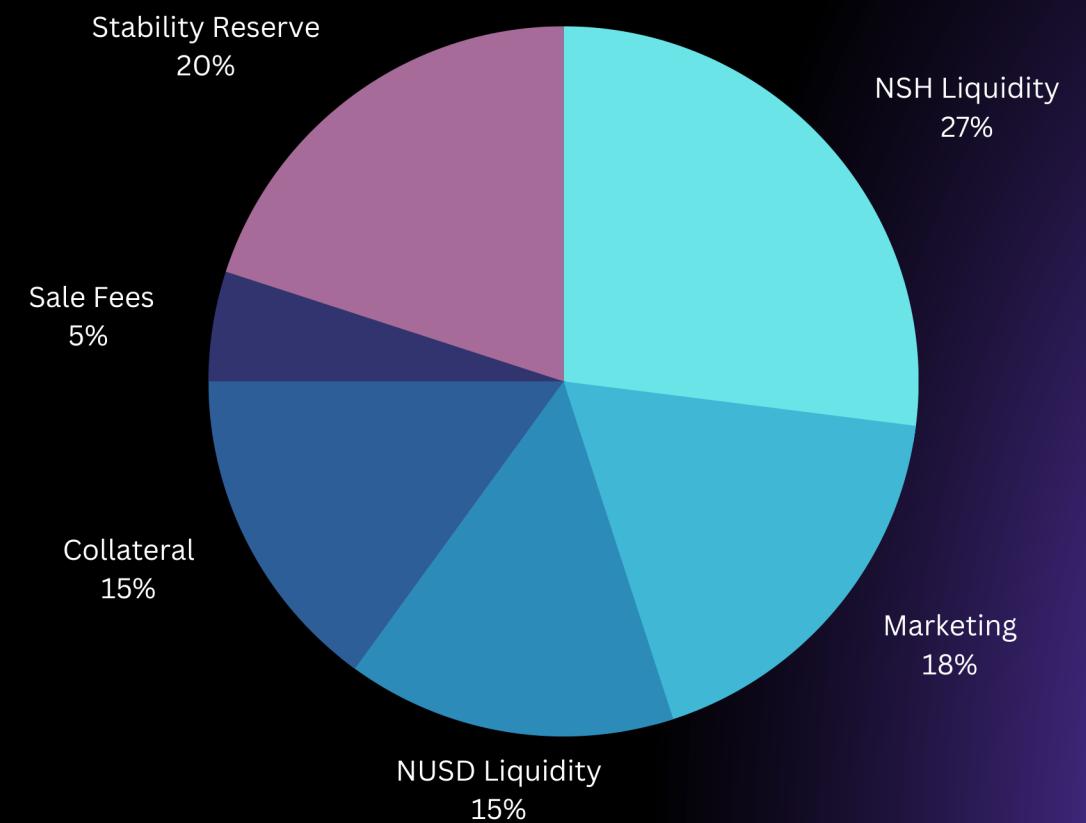

Minted With Bonds

NFTs

50 Nebuloids at .1 Eth - added to NUSD Collateral

NUSD Minting

Collateral

# Structure

## Sales-

- 1) Private sale - Soon
- 2) Nebuloid NFT - Following 2 / 3 weeks
- 3) Public sale - 4 weeks+

## Benefits

Our dual asset staking pool will be further incentivized for NFT holders. Dual asset reward staking over single asset staking is rewarded at a 3:1 ratio, but will increase to 4:1 if you hold the NFT while staking dual assets.

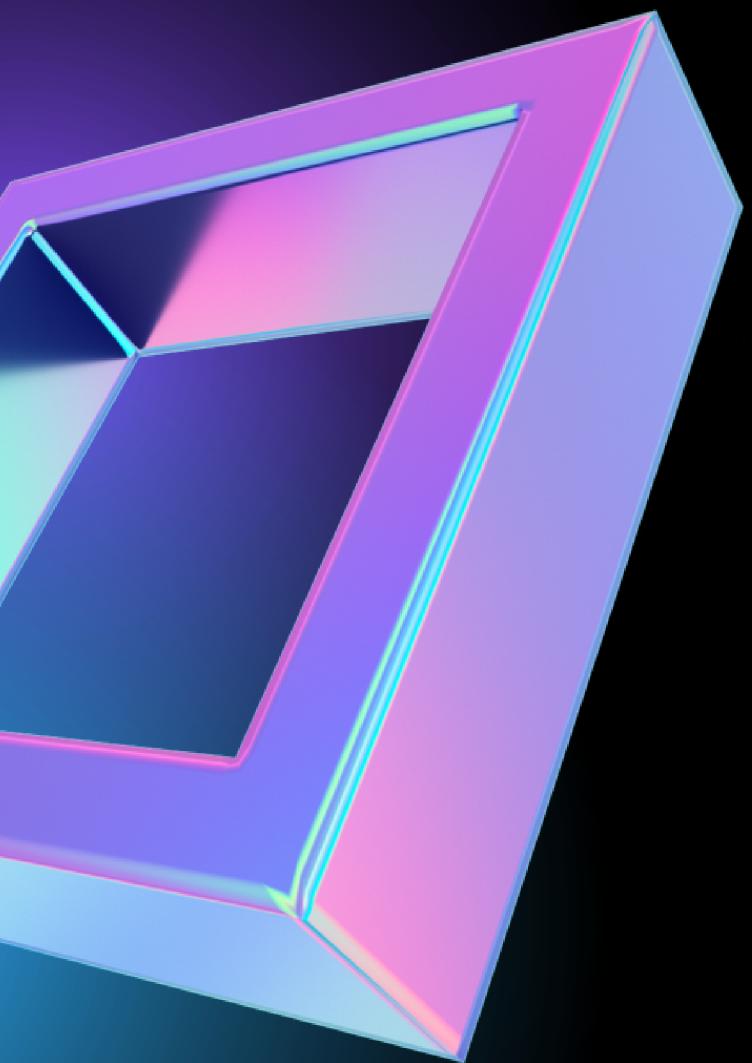

During launch we will hold a 72 hour NUSD minting phase. This will help provide initial collateral.

- First 24 hours - Private sale participants with NFTs can mint. Minting will be 1 USDT for 1 NUSD with a 10% tax, but an 13% NSH rebate (net positive 3%). Users can stake for those 3 days in and gain NSH every epoch.
- Second 28 hours - Private sale participants without NFTs will be allowed to mint. Same as above but with a 10%/12% structure.
- Finally on last day, NFT holders who missed the presale will have their chance, but with a 10%/11% NSH rebate structure

After minting concludes, we will add liquidity, open market orders, and launch staking pools.

Nebuloids Sneak Peak
